

PRACTICE WRITING WITH DINOSAURS!

**A PREHISTORIC HANDWRITING
WORKBOOK FOR KIDS**

TERRY DACTALL

Tyrannosaurus rex

Name: *Tyrannosaurus rex*, *T. rex* (“king tyrant lizard”)

Dates: 68–66 million years ago

Size: 21–40 feet long | 12–20 feet tall | 5–14 tons

Description: *Tyrannosaurus rex* was the king of the dinosaur world—one of the most fearsome dinosaurs of all time. During its reign, it lived in modern-day North America and was by far the biggest predator around. It had the strongest bite of any land predator, ever. *T. rex* used its enormous skull, powerful jaw, and massive, muscular hind legs to hunt down pretty much any dino in its territory—even armored dinosaurs like *Ankylosaurus*. *T. rex*’s giant tail balanced its huge skull; its front limbs, while tiny, were strong and equipped with two sharp claws.

Print the words Tyrannosaurus rex.
